MAY CUT DOWN FORCES.

Secretary MacVeagh Begins Work to Effect Reforms.

Secretary of the Treasury MacVeagh issued an order yesterday appointing a committee consisting of C. D. No chairman; C. D. Hilles, and James B. Reynolds to investigate every division office of the Treasury Department, with a view to cutting down the running expenses as far as compatible with effi-

cient service,
It is believed that as a result of this order the working forces of some of the offices will be reduced and other divi-

The Secretary wishes to effect reforms that will be permanent. He said that, like Mr. Nagel, he wanted a department full of clerks who gave a "full day's work for a full day's pay."

It is estimated the work of the com-

mittee will last six or eight weeks, and that it will reduce the expense estimates for the fiscal year 1911. Epworth League Gives Outing.

nstruments are located is in the basement at the south corner of the Healy Building, the main one in the college group. The concrete columns upon which Mrs. J. F. Saunders and Miss Saunders the instruments are to be fixed are in are spending the month of July at the Hotel Cape May, in Cape May, N. J.

Teadiness, and the maximum and minimum wet and dry bulb thermometers. mum, wet and dry bulb thermometers have already arrived. The seismographs are intended to detect and record by lyn have gone to Atlantic City for the mean of a fine needle pen both disturbances in the horizontal and vertical planes, and were made by Spindler & Hoyer, of Gottingen, Germany. They are of a later and better type than those now installed at the Weather Bureau, and it is anticipated that the results obtained will be more correct than those recorded at the government station.

The Jesuits have long interested them-

selves in scientific investigation, and are recognized the world over as authorities In connection with this establishment of a siesmograph station, the whole south wing of the Healy Building, through the generosity of Francis Riggs, has been torn down, and is being remodeled into a library, which will contain the archive of colonial history, the Riggs Library, and the Hearst collection of scientific and popular books.

PROTEST AGAINST FEES.

Commissioner Macfarland Recor mends an Equitable Relation. Following the protest recently made by New French Ministry Gets Vote of Heiskell & McLaren, real estate brokers. against the "injustice of the unreason able and extortionate charges under the there is a large colony of Washington's new minister's policy, made in the new schedule of rates for permits in the Chamber of Deputies this afternoon, says building inspector's office authorized by the cabinet is animated by a steadfast act of Congress, in which a fee of \$1 is the work on which cost \$2.50, Commissioner Macfarland vesterday recommend. ed that the building regulations be so Doocy were entertained at Trinity Co:- in the policy pursued hitherto, notably relation between the cost of the work

will allow no doubt of the sincerity of Commissioner West favors a graduated the ministry. The declaration continues: scale of fees for repair work, depending

It is not probable that Engineer Commissioner Judson will take the same view as the other Commissioners do. The building inspector's office is under the engineering department, and the new scale of prices for building permits, which went into effect July 1, being double the old rates, were formulated and authorized by act of Congress under the recom mendation of the engineering departement so as to make the receipts of the office The ladies of the olden days prided meet all expenses.

The action of Commissioners Macfar-

land and West will result in a revision of the existing rates to a basis of more equitable fees.

How Its Curious Mechanism Disappeared in China.

From the London Times, In the eighteenth century an ingenious ieweler named James Cox, of Shoe lane. London, constructed a clock which was rendered perpetual by a cleverly contrived attachment which utilized the rise and

home of the bride's mother, Rev. W. L. bill will be sent later for the amount due. a cog wheel in such a manner that whether the mercury rose or fell the wheel always revolved in the same dire tion and kept the weights that supplied the movement of the clock always wound up. The barometer bulb dipped into a mercury cistern. The cistern hung attached to the extremities of two rockers. to the left end of one and the right end

of the other. The bulb was similarly attached to the other extremities of the rockers, which are thus moved every time there is a change in the amount of mercury in bulb and cistern, respectively. The rockers actuated a vertical ratchet, and the teeth were so arranged that the wheel they tion, whether the ratchet ascended or de-

The clock itself was an ordinary one, but of very strong and superior workman-ship, and was jeweled with diamonds at a glass case which, while it excluded dust, displayed the entire mechanism. The fate of Cox's clock was brought to light in a work called "Travels in China," published in 1804 and written by John

In this book it is stated that in the list of presents carried by "the late Dutch Ambassador" were "two grand pieces of machinery that were part of the curious museum of Cox." One of these apparently was this perpetual clock, and it was taken by the Dutch Ambassador to China, where in the journey from Canton to Pekin both the instruments suffered some slight damage. Efforts were made to repair Pekin, but on leaving the capital it was discovered that the Chinese Prime Minister Ho-tchang-tong, had substituted two other clocks of very inferior workmanship and had reserved Cox's
